

GTE Summer School 2019

Joint Russian-European Summer School on the design of aircraft engines is organized in Samara. This is a three-week summer school starting on July 15 and ending on August 2. Samara University is a scientific and educational center of the leading aerospace cluster in the Russian Federation. It is an outstanding place to get an insight of the long and successful Russian research on aerospace. The University offers a unique opportunity for the School participants to get an overview of the interdisciplinary development process of aircraft engines. No other institution in Europe is able to offer such a comprehensive range of disciplines.

Topics of the school

- The construction and design of aircraft engines
- The construction and design of the systems of aircraft engines
- Strength operational development of aircraft engines
- Strength calculation of aircraft engines
- Safety and reliability of gas turbine plants

Duration: 21 days (3 weeks).

Deadline: 8 April 2019.

When: July 15 – August 4, 2019

Participants number: 18 graduate or postgraduate students.

The head of the Department: prof. Sergey V. Falaleev
